

## **Telecommunications Workshop** **AVAILABLE ON REQUEST**

A comprehensive 2-day workshop is sponsored by Don HEIRMAN Consultants and Lichtig EMC Consulting.

**The workshop will review the latest information and application of Telcordia Technologies GR-1089-CORE criteria for telecom equipment and to present the latest activity in amending the int. EMC standards that apply to information technology equipment (ITE). Telecom equipment must also meet the ITE requirements if part of the telecom network—ETSI EN 300 386. The workshop will cover GR-1089 and CISPR Publications 22 (Emissions) and 24 (Immunity) with reference to ETSI EN 300 386, including proposed changes. Both speakers are members of the US delegation to CISPR meetings as well as contributors to the technical work for many years in both the US and these meetings. John Lichtig had responsibility for the EMI section of GR-1089 at Telcordia for the last 15 years. Don Heirman brings over 30 years of experience in EMC standardization.**
